

UNILINK

One system multiple applications

3.1 Amps Rapid Charging Hub/Switch

New!

The Unilink Hub is the most powerful rapid charging module available, it provides serious charging capability for simultaneous rapid charging of *Ipads, Android tablets, Ipods and Smart Phones* direct from the mains.

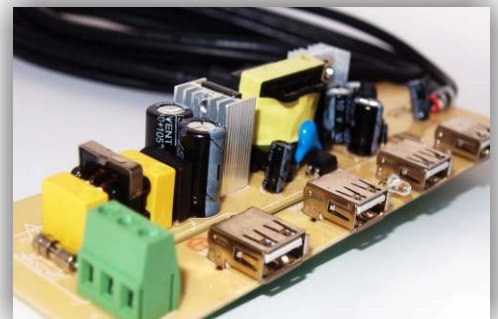

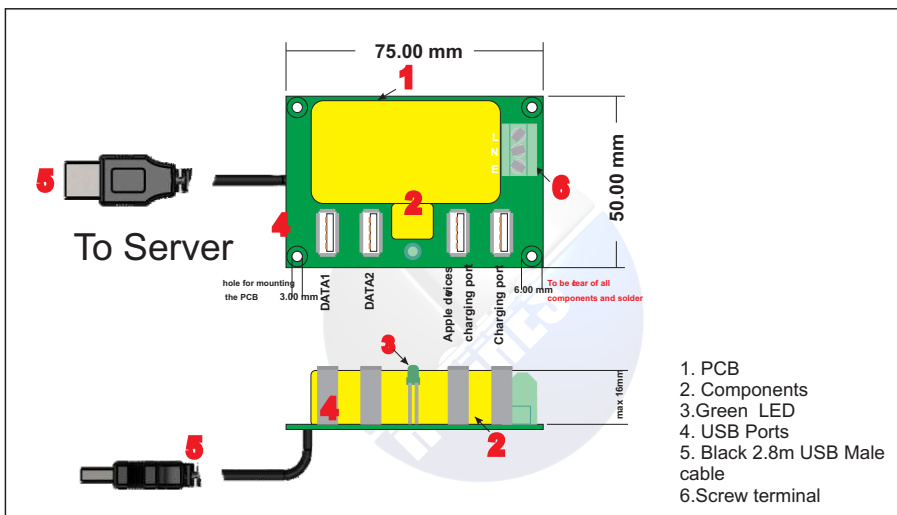

- * Available as Desk mount
- * Available with USB 3.0
- * 3.1Amp Charging
- * Compact 75mmx50mm
- * Mini Hub/Switch Function

It looks like another innovation success for the Hughes Electronics R&D team – A 3.1 amp rapid charging USB 2.0 Hub powered directly from any voltage mains supply.

The new design incorporates its own universal power supply that can transform 110-240 mains voltage and deliver up to 3.1 amps to two on board USB charging ports.

The new design can come as a standalone unit or be incorporated into any mains supplied devices such as mains sockets, desktop coalition units, trailing sockets or even everyday items like table lamps and telephones.

Greg Rymar head of product development said ‘Unlike other 3 amp charging devices our USB 2.0 Rapid Charging hub does not require an external power supply’ he went on to say ‘we can reconfigure it to incorporate as many USB ports as are required and in virtually any mains supplied product with enough space so it’s pretty flexible’.
