

UNI LINK

One system multiple applications

Unilink is designed to simplify distribution of power and data and unify the outlet structure; it can be used in virtually every application throughout the building. Uni-Link is the first ever Grid Outlet Position (G.O.P) product to offer true 19" rack mountability.

UK Socket Module

Master/Slave Module

RCBO Module

Data Module

Single Fuse Module

Double Fuse Module

Switch & Fuse Module

Lockable Power Buses Connect Modules together

The unique modular design is outstandingly multi-functional, it makes literally hundreds of combinations of power and data outlet configurations possible for either, desk, cabinet or wall mounted applications, alternatively it can simply be deployed as a trailing socket attached to the powerline.

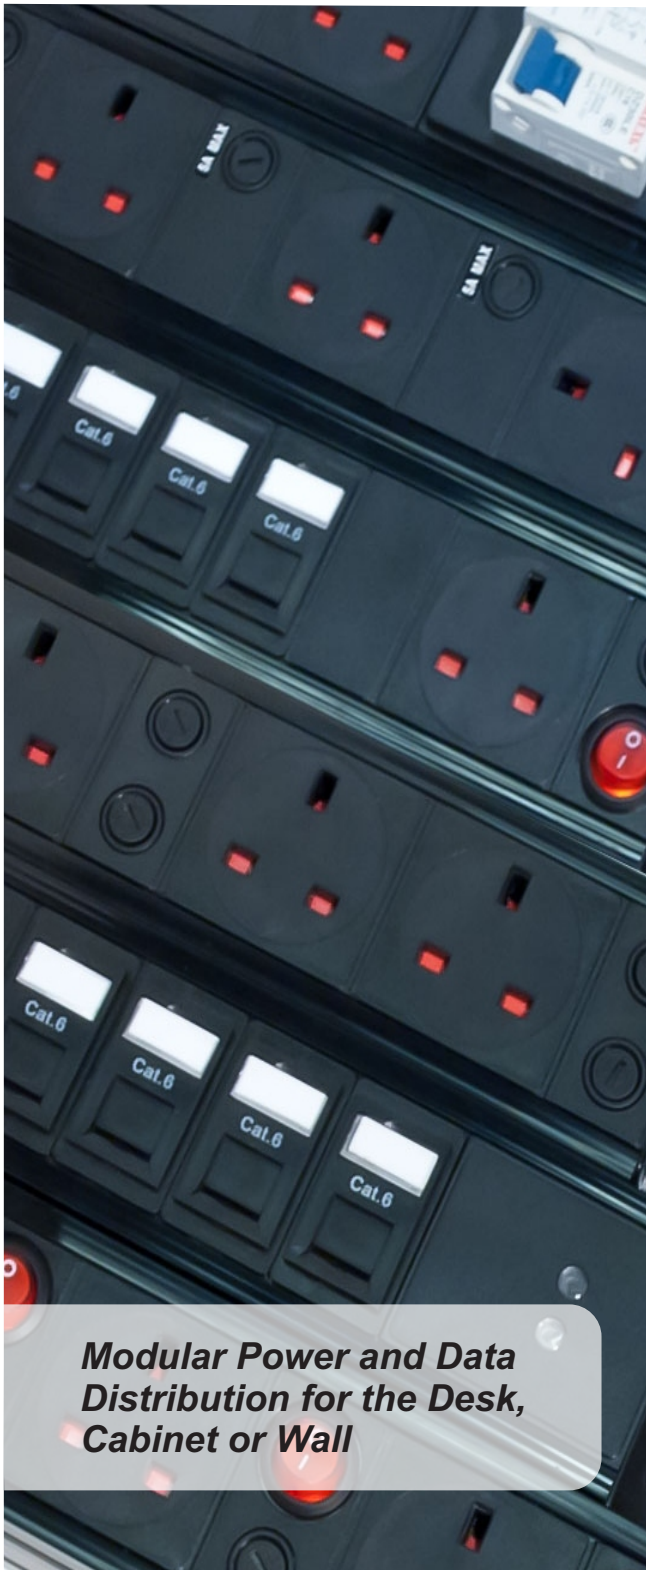

When combined with Hughes Electronics performance guaranteed data cross connects Unilink provides the only desk data system with a manufacturer's warranty of performance - an outright winner in its class.

New!
